

Irving Rafael Conde Marín

Orizaba, Veracruz | Irving.CondeM@gmail.com | +52 272-149-5728
Full Stack Developer | Python, Ionic, NestJS, Angular, AWS Services

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience in full stack development, mobile apps, backend services and cloud infrastructure. Current experience at DISH Mexico (MVSHUB) with Python, Ionic and AWS services including Lambda, S3, CloudFront, DynamoDB, VPC and Elastic Beanstalk. Also contributes to Hostlyc designing system architectures and flows, building NestJS services with Prisma/TypeORM, and developing cross-platform solutions with Angular, Ionic and Electron, using AI-assisted tools such as Codex and Amazon Q.

EDUCATION

Bachelor of Software Engineering - Universidad Veracruzana *September 2020 - August 2024*
Ixtaczoquitlan, Veracruz

PROFESSIONAL EXPERIENCE

Full Stack Developer - DISH Mexico (MVSHUB) *August 2024 - Present*

- Develop and maintain full stack and mobile features using Python, Ionic, Angular and cloud services.
- Implement backend logic, automations and serverless components with Python and AWS Lambda.
- Work with AWS S3, CloudFront, DynamoDB, VPC and Elastic Beanstalk for storage, delivery, data access, networking and deployments.
- Support mobile app improvements, integrations, production troubleshooting, release validations and AI-assisted development with Amazon Q.

Full Stack Developer - Hostlyc *October 2025 - Present*

- Design system architectures, flow diagrams and technical documentation to improve implementation clarity and planning.
- Build backend services with NestJS, Prisma and TypeORM, integrating REST APIs, validation layers, business logic and relational databases.
- Develop cross-platform modules with Angular, Ionic and Electron for web, mobile and desktop-oriented workflows.
- Configure AWS S3, CloudFront and VPC resources, and contribute to mobile app development, deployments and documentation.

Back End Developer - GECOSOFT S.A. de C.V. *March 2022 - May 2024*

- Developed and administered Linux and Windows servers on AWS and Microsoft Azure for business environments.
- Built backend solutions using Python, Java, Node.js, SQL Server and PostgreSQL, supporting APIs, services and databases.
- Participated in infrastructure configuration, service maintenance, database support and enterprise troubleshooting.

Independent Full Stack Developer - Selected Projects *2022 - 2024*

- Delivered mobile/web apps with Ionic, Angular, NestJS, Node.js, Prisma, PostgreSQL, Firebase and MySQL.
- Built POS, attendance, client mobile and AI face-detection solutions; handled requirements, databases, deployment and maintenance.

TECHNICAL SKILLS

Languages & frameworks: Python, TypeScript, JavaScript, SQL, Java basics, Angular, Ionic, Electron, Node.js, NestJS, Prisma, TypeORM, Flask, Django, TensorFlow and Keras.

Backend & web services: REST APIs, authentication flows, validation layers, integrations, automation scripts, serverless functions and mobile backend support.

Databases: PostgreSQL, MySQL, SQL Server, Firebase, MongoDB and Amazon DynamoDB.

AWS & cloud: Lambda, S3, CloudFront, DynamoDB, VPC, Elastic Beanstalk, EC2, Lightsail, Microsoft Azure, Nginx and cloud deployments.

Architecture & tools: System architecture, flow diagrams, technical documentation, GitHub, CI/CD basics, VS Code, Postman, Windows and Linux.

AI-assisted development: Codex, Amazon Q, code analysis, debugging support, technical documentation and productivity improvement workflows.

LANGUAGES

Spanish: Native | English: Basic technical
